Dean,

See draft SOW and IGE attached. Heidi can weigh in on if these still look more or less like what we need, they are over a year old. On the call yesterday the need for contractor proposals on the TBD costs were discussed...I don't think that necessarily changes what is needed in the IGE beyond the historic estimates, but again, Heidi can weigh in.

I'm free to discuss tomorrow or Monday, have a big milestone to get through on NMI next Tuesday but then will really have more time to dive back in and help with the drafting.

Thanks
Chris

I started looking at the DES SOW. I can get going on this. Is there an example of one that made it through the system? Perhaps NMI/one Chris has completed? Main tasks for GE in PRP oversight, split sampling, and issuance of a proposed plan/ROD equivalent process.

Not sure how much generic language I keep and how much I modify with site-specific language (e.g. PM, QAPP, monthly project reports).

Also, Chris, let me know when have some time to discuss. I should be able to do the bulk of the drafting, but some pointers would be appreciated.

Thanks
